## 1 Description

This device is an implementation of a general model for turbine and governor TGOV5. This device is implemented as described in [1]. Implementation details can be viewed by inspecting the subcircuit of this device.

### 1.1 Pins

This device has 8 pins:

Pin name	Type	Description	Units
Pref	Input	Power reference from load controller LCBF1	pu
Pm_ic	Input	Steady-state mechanical power at t = 0, for initialization	pu
w	Input	Mechanical speed	pu
Pe	Input	Electrical power	pu
g_pos	Output	Gate position	pu
Pm	Output	Turbine mechanical power	pu
PmHP	Output	High pressure mechanical power	pu
PmLP	Output	Low pressure mechanical power	pu

### 1.2 Parameters

The default set of parameters are obtained from [2].

## 1.2.1 Governor tab

The parameters on the Governor tab are:

1. **Governor gain K**: Governor gain
2. **Lag time constant  $T_1$** : governor lag time constant
3. **Lead time constant  $T_2$** : governor lead time constant
4. **Time constant  $T_3$** : valve positioner time constant
5. **Coefficient  $K_9$** : the adjustment to the pressure drop coefficient as a function of drum pressure
6. **Coefficient  $K_{10}$** : gain of anticipation signal from main stream flow
7. **Coefficient  $K_{11}$** : gain of anticipation signal from load demand
8. **Coefficient  $K_{12}$** : gain for pressure error bias
9. **Coefficient  $K_{13}$** : gain between MW demand and pressure set point
10. **Coefficient  $K_{14}$** : inverse of load reference servomotor time constant
11. **Positive rate change limit  $R_{MAX}$** : load reference positive rate of change limit
12. **Negative rate change limit  $R_{MIN}$** : load reference negative rate of change limit
13. **Maximum load reference  $L_{MAX}$** : maximum load reference
14. **Minimum load reference  $L_{MIN}$** : minimum load reference
15. **Coefficient  $C_1$** : pressure drop coefficient
16. **Coefficient  $C_2$** : gain for the pressure error bias
17. **Coefficient  $C_3$** : adjustment to the pressure set point
18. **Frequency bias B**: frequency bias for load reference control
19. **Gain  $K_I$** : controller integral gain
20. **Lead time constant  $T_I$** : controller proportional lead time constant
21. **Lead time constant  $T_R$** : controller rate lead time constant
22. **Lag time constant  $T_{R1}$** : lag time constant associated with lead time constant  $T_R$
23. **Time constant  $C_B$** : boiler storage time constant
24. **Maximum controller output  $C_{MAX}$** : maximum controller output
25. **Minimum controller output  $C_{MIN}$** : minimum controller output
26. **Fuel time delay  $T_D$** : time delay in the fuel supply system
27. **Fuel and air time constant  $T_F$** : fuel and air system time constant
28. **Water wall time constant  $T_W$** : water wall time constant
29. **Gain  $K_{MW}$** : gain of the MW transducer
30. **Time constant  $T_{MW}$** : MW transducer time constant
31. **Gain  $K_L$** : feedback gain from the load reference
32. **Pressure error  $D_{PE}$** : deadband in pressure error
33. **Initial pressure set point  $P_{SPInitial}$** : Initial throttle pressure set point

## 1.2.2 Turbine tab

The turbine tab allows to input:

1. **Time constant  $T_4$** : steam flow time constant
2. **Time constant  $T_5$** : first reheater time constant
3. **Time constant  $T_6$** : second reheater time constant
4. **Time constant  $T_7$** : crossover time constant
5. **HP turbine power fraction  $K_1$** : high pressure turbine power fraction
6. **HP turbine power fraction  $K_3$** : high pressure turbine power fraction
7. **HP turbine power fraction  $K_5$** : high pressure turbine power fraction
8. **HP turbine power fraction  $K_7$** : high pressure turbine power fraction
9. **LP turbine power fraction  $K_2$** : low pressure turbine power fraction
10. **LP turbine power fraction  $K_4$** : low pressure turbine power fraction
11. **LP turbine power fraction  $K_6$** : low pressure turbine power fraction
12. **LP turbine power fraction  $K_8$** : low pressure turbine power fraction

## 2 Initial conditions

The initial output is equal to the generator mechanical power (base for power) at  $t = 0$  s.
